Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 02/02/2011 has been entered.

Response to Amendment

Amendment received on 02/02/2011 is acknowledged and entered. Claims 1-35, 48-52, 54-56 and 58-60 have been canceled. Claims 36-39, 41-47, 53, 57, 61-65 have been amended. New claim 66 has been added. Claims 36-47, 53, 57 and 61-66 are currently pending in the application.

Allowable Subject Matter

Claims 36-47, 53, 57 and 61-66 are allowed.

The following is an examiner's statement of reasons for allowance:

As per independent claim 36, the best prior art of record, O'Brien (Computers In Business Management), Gharavy (US 2003/0004840), Lederer, Jr. et al. (US 2002/0023109), and Ginter et al. (US 6,658,568; US 7,133,846; US 7,165,174), neither anticipates, nor, alone or combined, renders obvious the following limitations:

tracking, by the computer system, information related to business transactions between the energy supplier and the customer to identify a schedule of recurring

transactions that occur in a lifecycle of business between the energy supplier and the customer;

determining, by the computer system and in response to processing the second transaction record, a next expected energy usage business transaction between the energy supplier and the customer and a second time period of when the next expected energy usage business transaction is expected to be received based on the tracked schedule of recurring transactions that occur in the lifecycle of business between the energy supplier and the customer.

The best foreign art, Mackay et al. (WO 01/57613), while disclosing certain aspects of monitoring and executing financial transactions for clients based on business rules, fails to teach or make obvious the following limitations:

tracking, by the computer system, information related to business transactions between the energy supplier and the customer to identify a schedule of recurring transactions that occur in a lifecycle of business between the energy supplier and the customer;

determining, by the computer system and in response to processing the second transaction record, a next expected energy usage business transaction between the energy supplier and the customer and a second time period of when the next expected energy usage business transaction is expected to be received based on the tracked schedule of recurring transactions that occur in the lifecycle of business between the energy supplier and the customer.

The above has been written with particular reference to claim 36, but independent claims 57 and 66 recite limitations parallel to those which make claim 36 allowable, and are therefore allowable on the same grounds.

The remaining dependent claims are considered allowable, as they are dependent and based off of an allowable independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled "Comments on Statement of Reason for Allowance".
